Amendment in Reply to Office Action of November 18, 2005

| individual copies of the electronic content including said local portion to individual ones of the addressees in the identified edge server's respective group of addressees.

2. (Previously Presented) The method of claim 1, wherein the enabling act further comprises the act of supplying a list of identifiers of the addressees of the identified respective edge server's respective group to the identified respective edge server.

3. (Previously Presented) The method of claim 1, wherein the electronic content comprises an e-mail.

4. (Currently Amended) The method of claim 1, wherein the sending act further comprises sending a first portion of the electronic content to said local portion includes local information associated with the respective identified edge servers.

5. (Currently Amended) A method of distributing electronic content via a data network to a plurality of addressees, the method

PATENT  
Serial No. 09/900,561  
Amendment in Reply to Office Action of November 18, 2005

comprising the acts of:

identifying respective edge servers that are in close proximity to respective groups of addressees among the plurality of addresses;

sending to the identified respective edge servers one copy of the content and said respective groups of addressees associated with the identified respective edge servers;

enabling the identified respective edge servers to add a local portion to the copy; and

enabling the identified respective edge servers to send individual copies of the electronic content including said local portion to individual ones of the addressees in the identified edge server's respective group of addressees.

6. (Previously Presented) The method of claim 5, wherein the enabling act further comprises the act of supplying a list of identifiers of the addressees of the identified edge server's respective group to the identified respective edge server.

PATENT  
Serial No. 09/900,561  
Amendment in Reply to Office Action of November 18, 2005

7. (Previously Presented) The method of claim 5, wherein the electronic content comprises an e-mail.

8. (Currently Amended) The method of claim 5, ~~further comprising sending a first portion of the electronic content to the identified respective edge servers; enabling the identified respective edge servers to add a second portion to the first portion; and enabling the identified respective edge servers to send the first and second portions to the individual addressees in wherein said local portion includes local information associated with the respective groups of addressees.~~

Claim 9 (Canceled)

10. (Currently Amended) A computer program product that includes a computer readable medium having instructions stored thereon for:

enabling identification of respective edge servers in a network that are in close proximity with respective groups of
